Trust in the trailer experts

You never stop. You don't have time for things to go wrong or be overcomplicated. So when it comes to your livestock trailers, you want a simple solution that won't let you down, and one that works as hard as you do.

With 30 years of experience behind us, you know you can rely on an Indespension trailer; designed and manufactured in Britain, and built to outlast the competition. Be it for sheep, pigs or cattle we have a model to fit the bill, with market leading flexibility to suit your needs.

Our innovative designs and features are driven by the needs of our customers, to work, smoothly and simply come rain or shine – and really make a difference to your everyday experience.

Thanks to our 22 Indespension stores plus dozens of stockists across the UK & Ireland, all supported by Head Office sales and technical backup, you are never far away from professional and friendly Indespension service.

Indespension
trailers are
manufactured
in the UK and
represent the
very best in
trailer design

The leading edge of innovation for livestock trailers

STRONGER

All steelwork is hot dip galvanised while heavy-duty suspension systems provide maximum strength and durability

LIGHTER

Extensive use of aluminium increases payload

SMARTER

Our trailers are packed with invaluable features to make every stage easier

The difference is in the detail

When you choose an Indespension trailer you know you are getting the very best of British craftsmanship and design.

We have recently redesigned our Livestock trailers from the ground up, creating an industry leading range that sets new standards of robustness and longevity. They are packed full of invaluable features driven by the needs of our customers, making your trailer experience hassle free.

From slam shut gates to our rapid sheep deck system, as soon as you experience an Indespension trailer for yourself you'll realise the difference design innovation can make.

Features & benefits

BODY

- Inspection doors on both sides as standard - improves safety when loading or inspecting
- Hanging position for dividing gates on every arch maximises flexibility in use
- Upper and lower lift-off access doors are easier to remove and refit
- Longer side vents mean it's quicker and easier to deploy
- Robust one piece aluminium mudguards - no sagging plastic
- Easy single lever quick release on ramp
- Chequer plate steps front & rear of mudguards - maximises inspection access
- Strong anti-burst rail
- Aluminium side sheeting is lightweight and robust
- Aluminium chequer plate over tanalised timber floor

COUPLING

- Triple lock high security head fitted as standard - strong cast iron head, zinc coated with integral lock. Bolt cupped and capped for improved security
- Cast iron delta style Indespension coupling - able to withstand greater force
- Superior friction welded draw tube

JOCKEY WHEEL

- 48mm heavy duty jockey wheel with unique anti-vibration lock pin design
- No need for locking R clips
- Grease nipple fitted to allow lubrication

**Model shown has double wing gates, sheep deck and fold down front*
