

**AGRITON**

**EM Skin Care**

**Topical microbial spray used to inhibit the growth of pathogenic fungi and bacteria, such as Ringworm**

EM Skin Care is an active blend of naturally occurring, disease suppressing, micro-organisms. In practice EM Skin Care has shown to be highly effective in combatting fungal conditions, such as Ringworm.

EM Skin Care contains no chemical or pharmaceutical components and is free from antibiotics. EM Skin Care helps promote the naturally occurring healthy micro-flora on the skin to inhibit the growth of pathogenic fungi and bacteria. Pathogenic microbes can become established on the skin from contact with other infected animals, or following adverse weather conditions or minor grazes and scratches.

EM Skin Care forms an active protective film on the skin providing long term protection as well as stimulating the natural protective acid mantle in the skin. EM Skin Care also contains lactic acid which moisturises damaged skin and promotes healing.

## **Benefits**

### **Agriton | EM Skin Care**

- **Improves natural micro-flora**
- **Inhibits the growth and spread of Ringworm**
- **Quick and easy to apply**
- **Forms protective film on skin**
- **Promotes healing**

EM Skin Care is a mix of naturally occurring Effective Micro-organisms (EM) that works by competitive exclusion to overwhelm and suppress harmful pathogenic fungi and bacteria on the skin.

**Agriton, working together for a sustainable future**

*"Using EM Skin Care on Ringworm in my young stock was a game changer. EM Skin Care has replaced antibiotic sprays as our go too for minor problems"*

*Mr Hugo,  
Dairy Farmer*

**Application:** Available in a handy 1 litre spray bottle

**Cattle:**

Spray directly onto infected area until moist then massage in with a soft paint brush or gloved hand. Repeat for 7 days. \*Gloves must be worn\*

When a large number of animals are affected and infection is reoccurring frequently it can be advisable to treat whole housing area where fungal spores can reside.

**Equine:**

EM Skin Care is great for cleaning and keeping your Horse looking its best. EM Skin Care promotes the natural micro-flora of your horse, helping maintain its shine as well as warding off harmful bugs. Simply spray onto your horse before and after cleaning. You can also use EM Skin Care under blankets, Saddle cloths and Numnahs.
